ABOUT COMPUTERS

SUSTAINABILITY

KUBB is dedicated to a responsible approach based—in both its production and development—on a never-ending demand for quality and reflected in its cultural, societal and environmental commitments.

KUBB is very loyal to its industrial suppliers. The stability of these partnerships, based on shared values, make it possible to guarantee the security of the supply.

KUBB have local partners in many French regions. 70% of KUBB creations are manufactured there and sometimes even 100%.

Since its creation, **KUBB** has employed teams of disabled workers (ESAT) in the Toulouse region. They oversee the assembly of the PCs.

KUBB products are made with zero plastics and motherboard built with low-temperature solder for approximately 25 percent energy savings.

All **KUBB** devices are designed to be customized, upgradable and yes, to be repaired.

OUR DNA

In a constantly evolving I.T. world, KUBB, by placing the individual at the heart of its strategy, offers an alternative that is both traditional and modern. Indeed, driven by a passion for beautiful objects and attention to detail, we demonstrate daily that the alliance between digital culture, the art of living and the tradition of French artisanal know-how can bring solutions to life innovative technologies.

**KU
BB**

Beyond its small size (12cm) and aesthetics, **KUBB** is more than an amazing computer, it's a concentrate of new technologies with exceptional performance. Perfect for business and family use, the bewitching charming **KUBB** computer revolutionizes your I.T. with a new vision that is both pragmatic and minimalist.

What is a KUBB AI?

AI KUBB use artificial intelligence technologies to elevate productivity, creativity, gaming, entertainment, security, and more. They have a CPU, GPU, and NPU to handle AI tasks locally and more efficiently.

CPU: Fast Response. You can rely on the central processor for smaller workloads at low latency.

GPU: High Throughput. The graphics processing unit is ideal for large workloads that require parallel throughput.

NPU: Power Efficiency. The neural processing unit handles sustained, heavily-used AI workloads at low power for greater efficiency.

VERSATILITY AND SILENCE

KUBB is a French computer whose exclusive and timeless design perfectly embodies the raw elegance of the lines of a cube (12x12cm). Build around the latest generation Intel® Core™ processors and its innovative thermal system allows it to carry out the most demanding tasks, and all in complete silence. KUBB with its unprecedented performance is a truly ultra-versatile computer suitable for the business and family use.

WOOD COLLECTION

The **Wood KUBB** is an extraordinary mini-PC, the result of the encounter between the refined qualities of wood, crafted by a cabinetmaker, and our desire for high-quality, innovative, elegant and high-tech tools for everyday use. A beautiful interior object that will meet your professional and entertainment needs.

Each handcrafted **Wood KUBB** computer case is produced in a small series, making it an exceptional and unique product made of a natural and living material that will add a touch of elegance to your interior space.
